EVACUATION PROCEDURE

In the unlikely event that you do not complete the loop, then you may slide backwards towards the base of the ride. If this occurs please ensure you follow our procedures.

- Remain calm and lying on your back with your arms across your chest. The ride will automatically stop and no one will come down behind you.

- Do not attempt to sit up until you have come to a complete stop.
- You may exit the slide through the escape hatch when you have come to a complete stop.
- Remain on the platform, do not re-enter the slide. A staff member will arrive to assist you.

JE

A control panel for a door or slide mechanism. It features three green push-buttons labeled 'WATER', 'END OF SLIDE', and 'EGRESS'. To the right, there is a black rectangular label with the word 'LOC' in white. Above the buttons is a circular component labeled 'DOOR 1'. Below the buttons is another circular component. A black coiled cable is connected to the panel. A metal chain is attached to the panel and runs across the door frame.
